

# Sparsh Jasiwal

Ghaziabad, India | sparsh.jas07@gmail.com | +91 9971705484 |

LinkedIn | Github | Twitter

## Skills

---

**Languages:** Dart, Typescript, JavaScript, C

**Tools and Technologies:** Flutter, Bloc, Riverpod, Mobx, Provider, Node.js, Express.js, Git, Github, Docker, AWS, Prisma, Shorebird, Firebase, PostgreSQL, Supabase, SQLite, Hive

## Experience

---

**Senior Software Developer**, AppSynergies – London, UK (Remote) July 2023 – Present

- Successfully led and delivered 5 complex Flutter projects while mentoring a team of junior developers
- Architected and implemented feature-based MVVM architecture across projects, improving code maintainability and team collaboration
- Streamlined deployment processes by implementing CI/CD pipelines using Shorebird and Fastlane, reducing release time by 60%
- Established robust monitoring systems using Firebase Crashlytics and Sentry, resulting in 90% reduction in production crashes
- Collaborated directly with clients, product managers, and UI/UX designers in requirement gathering and feature planning phases
- Developed comprehensive testing strategy including unit and integration tests using Mockito, achieving 80% test coverage
- Performed critical analysis of UI/UX designs to identify edge cases and potential user experience improvements before development

**Mobile App Developer**, AppSynergies – London, UK (Remote) June 2021 – July 2023

- Played a pivotal role in developing Minglewise, a successful dating application with 100,000+ downloads and 10,000+ daily active users
- Transformed complex Figma designs into highly responsive and pixel-perfect UI components, ensuring a seamless user experience
- Engineered real-time chat and video calling features using WebRTC and Socket.IO, maintaining stable connections and low latency

## Projects

---

**Property Dictionary** Play Store

- Developed a property listing app with features like property search (name/location), filters. Built an admin panel for property uploads, user data management, and analytics
- Tools Used: Flutter, Mobx, Node.js, Express.js, Postgress, Prisma and AWS

**UCall** Webiste Link

- Led development of a wallet-based service marketplace platform enabling service providers (plumbers, electricians, etc.) to create profiles and receive leads through a points-based system; implemented features including provider wallet management, geolocation-based search, automated slot generation, real-time chat, and booking management, resulting in streamlined lead generation and improved user engagement.
- Tools Used: Flutter, Riverpod, Flutter Hooks, Go Router, and Firebase

**MeTube** Github

- Developed a Flutter CRUD app with video player integration, featuring YouTube-style autoplay in list views. Demonstrated Clean Architecture, SOLID principles and dependency injection.
- Tools Used: Flutter, Bloc, Supabase and Get It

## Education

---

**Sharda University**, B.Tech in Information Technology Sept 2018 – May 2022  
Grater Noida

**St. Xavier School**, 12th CBSE Apr 2014 – Jan 2022  
Delhi
